Best Practices Recomended for Ei Mindspark	13

This report provides a detailed analysis of student engagement and learning outcomes for **Silver Oaks International School Kommadi** during the academic year **2025**, covering the period from **01-Jun-2025 to 31-Mar-2026**. The report includes data for the following registered classes: **3 to 9**. A total of 257 students participated in the Ei Mindspark program during this period.

OVERALL METRICS AND ENGAGEMENT

Average usage (per student)	Students Logged In (72.4%)	Total Questions Attempted
22.2 mins/week	186 / 257	215,807

Overall Accuracy	Overall Teacher Usage	Total Remediation Instances
71.7%	75 hrs	379

Total Games Played	Average Games played per Student	Teacher Time Saved (in mins)
1,448	8	3,697

Total Higher Level Instances	Average Questions Attempted per Student
370	839

Mindspark Usage Insights

The average weekly usage by an active student is approximately 22 minutes, indicating a need for improvement to see better impact from the program. While the overall accuracy stands at an encouraging 71.73%, active intervention is required to increase usage duration and engagement.

Around 72% of students have logged into Mindspark, presenting an opportunity to enhance adoption and drive higher participation. With an average of 840 questions attempted per student and a total of 215,807 questions tackled, the platform has witnessed substantial academic activity.

Efforts should be directed towards increasing the percentage of students regularly utilizing Mindspark, aiming for at least 80% active user engagement.

Strategies to boost average weekly usage duration, targeting a minimum of 60 minutes per active student, could yield more significant learning outcomes.

Continuously monitoring subject-wise or grade-wise performance trends can help identify areas for targeted academic support and personalized interventions.

**Note: The above insight is generated by AI, and it may not be as much accurate as it can be.*

CLASSWISE LEARNING PROGRESSION FROM PRE TO POST CHECKPOINT

Learning in Ei Mindspark can be best seen through checkpoints designated as Pre and Post checks before commencing and after finishing a topic activated by a teacher. Through this, learning gains can be observed across topics for every class.

Checkpoint (before) Checkpoint (after) Learning Gains

Class	Progress (Before/After)*	Learning Gains	Total Students
Sufficient information is not present for classes **3, 4, 5, 6, 7, 8, 9**			

**Based on data from students who completed both the pre- and post-checkpoints*

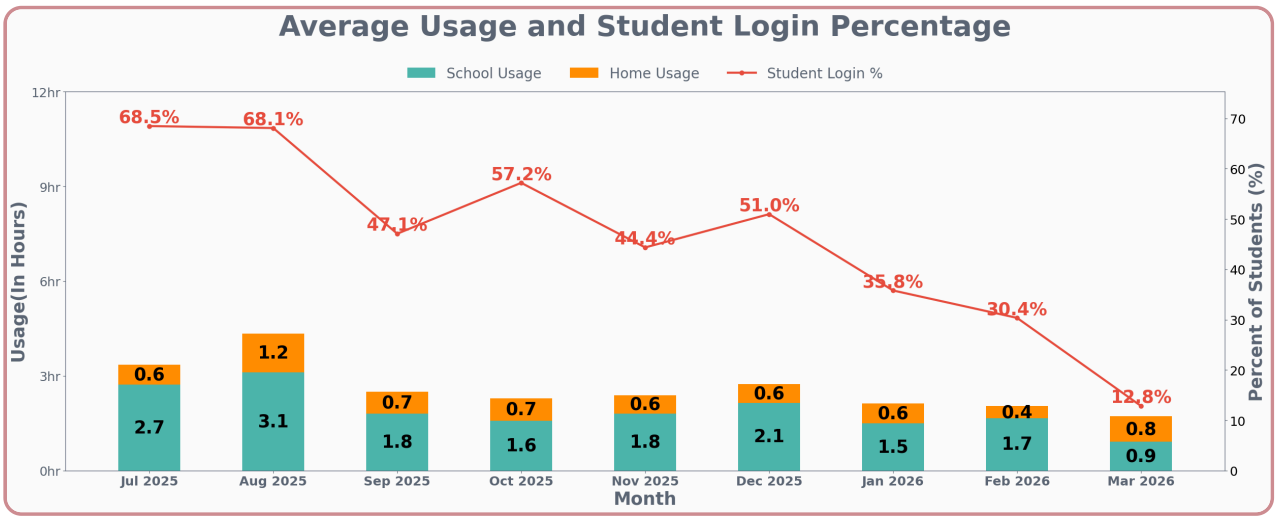
CELEBRATING ACHIEVEMENTS AND MILESTONES

Learning is not just about reaching the destination but also about cherishing and celebrating the milestones along the way. Sparkies in Ei Mindspark are virtual rewards and incentives awarded to students to encourage their learning progress, creating a positive learning environment that motivates students to actively participate, persist, and excel in their educational journey.

Class	Most Sparkies Earned By	Number of Sparkies	Most Questions Attempted By	Number of Questions Attempted
3	Mitranshu Kumar Palo	13522	Mitranshu Kumar Palo	12368
4	Anantha Maddugaru	6195	Krithik	5079
5	Sri Harsha Duddupudi	4868	Sri Harsha Duddupudi	3609
6	Lakshmi Nikshita Doddi	5523	Lakshmi Nikshita Doddi	2796
7	Narasimhan Sohan Dakshith Korupolu	1852	Jayant Srisai Vedulla	1410
8	Vedansh Gadam	1603	Vedansh Gadam	1263
9			Chhandana Saai Varadapureddi	0

MONTHLY ENGAGEMENT METRICS

Usage and login are first level indicators of activity on Ei Mindspark. Structured usage of Ei Mindspark has been found to lead to significant Learning Gains/Needs. The following charts highlight the total time spent by students in hours along with the percentage of students logging in, presented on a monthly basis.



*Total usage every month at home (4PM-8AM) and at school (8AM-4PM)

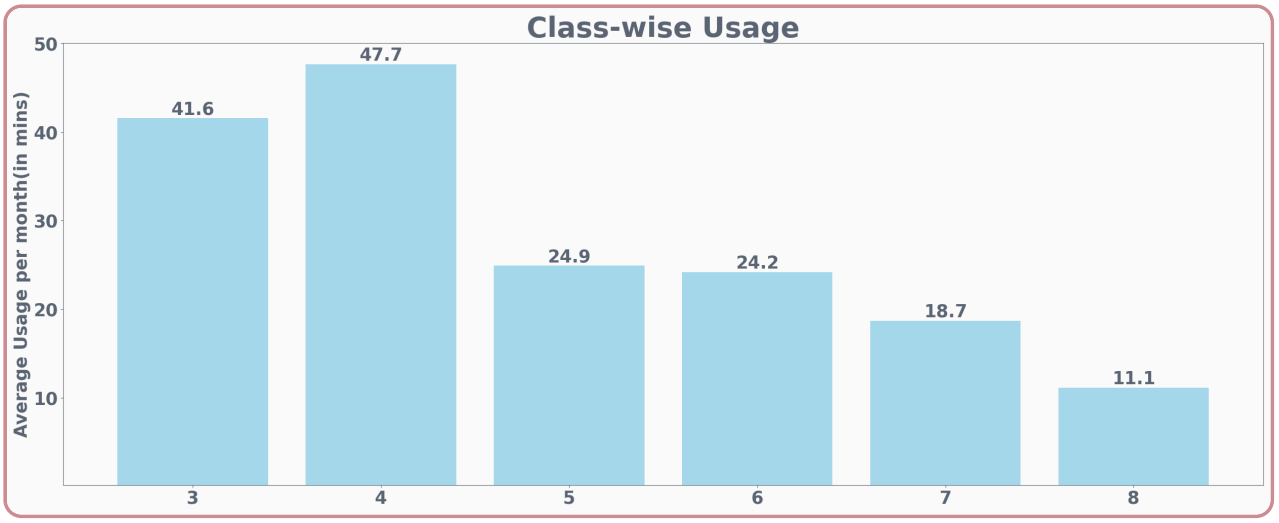
Monthly Usage Insights

1. Highest usage peaks were in Jul-2025, Aug-2025, and Dec-2025.
2. Usage declined after Aug-2025, suggesting higher summer activity.
3. Overall usage fluctuated, with peaks and valleys across months.
4. School usage greatly exceeded home usage in most months.
5. Student login percentages dropped sharply after Jul-2025, requiring attention.

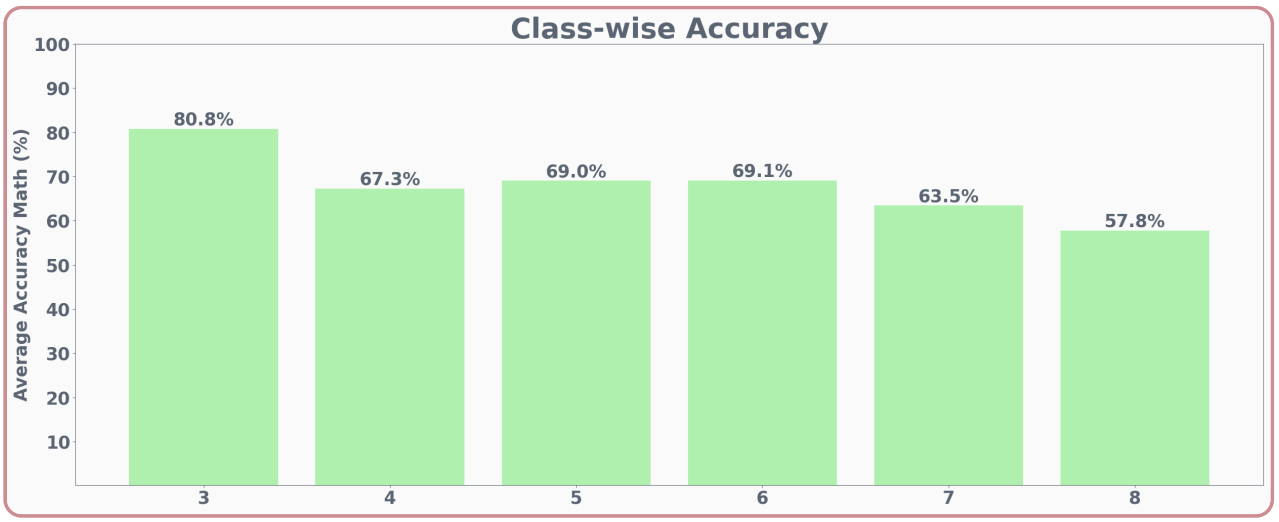
Note: The above insight is generated by AI, and it may not be as much accurate as it can be.

CLASS-WISE USAGE AND PERFORMANCE METRICS

The following charts shows the total usage (in minutes) and performance accuracy (in %) spread across each class. Performance in Ei Mindspark is an accumulation of accuracies built through learning, remediation, revision and accessing higher levels.



*Classwise total usage (in minutes)



*Classwise Accuracy (in %)

Class-Wise Usage Insights

1. Average usage across all classes is relatively moderate and active.
2. Classes 3 and 4 exhibit the highest engagement levels consistently.
3. Classes 7 and 8 show the lowest usage among students.
4. Usage decreases gradually as the class numbers increase from lower to higher.

Class-Wise Accuracy Insights

1. The overall accuracy levels across classes vary quite a bit.
2. Class 3 has the highest accuracy at 80.8%, followed by Class 4 at 67.3%.
3. Classes 8 and 7 have lower accuracy.

**Note: The above insight is generated by AI, and it may not be as much accurate as it can be.*

Essence of Remedials

Ei Mindspark aims to support and guide students toward addressing any knowledge gaps or difficulties they may be facing by providing scaffolding in the form of remedials. They serve as a valuable learning tool to help students strengthen their grasp of the concept and enhance their overall learning experience.

Class	Total Remediation Instances*	Successful Remediation Instances†
3	35	29 (**83%**)
4	129	91 (**71%**)
5	66	51 (**77%**)
6	85	65 (**76%**)
7	28	22 (**79%**)
8	36	26 (**72%**)

**Note: The remediated learning units are not unique; a student can enter remediation multiple times.*
†Note:These figures represent non-unique children who received remedial support to clear specific concepts. A successful remediation instance refers to a case where a student demonstrated improved understanding of the concept after receiving remedial support

The data shows the total number of successful remediations and the number of children who got remediated across different classes. Class 4 had the highest number of successful remediations and children remediated, followed by Class 6. Classes 3, 5, 7, and 8 had relatively lower numbers. Overall, the data suggests that remediation efforts were more successful in the higher classes compared to the lower ones.

EI MINDSPARK HIGHER LEVELS

Essence of Higher Level

EI Mindspark helps students go beyond the basics by offering advanced content that challenges them to think critically and deepen their understanding. These extensions encourage students to strengthen their skills, develop mathematical thinking, and become independent learners by exploring advanced concepts on their own.

Class	Total Higher Level Instances*	Successful Higher Level Instances†
3	213	203
4	74	60
5	46	41
6	29	28
7	8	7

**Note: The higher level learning units are not unique;*
†Note: These figures represent non-unique children who went to higher level instances .

The data shows that higher level instances are more prevalent in lower classes, with Class 3 having the highest number of instances and children clearing them. As the class level increases, the number of instances and children clearing them decreases. For example, Classes 3, 4, and 5 have a significantly higher number of instances compared to Classes 6 and 7.

LEVERAGING EI MINDSPARK TO ENHANCE TEACHING/LEARNING

Students' learning outcomes are significantly enhanced when teachers actively engage in their learning process. Ei Mindspark offers relevant data and monthly reports designed to gain valuable insights into various aspects of student learning. Teachers can track the progress and accuracy of each topic covered in Ei Mindspark. The Ei Mindspark teacher interface also provides a detailed learning trail for each student, showcasing their journey through different concepts and exercises. Ei Mindspark reports highlight common wrong answers and misconceptions, enabling teachers to address specific learning gaps and correct misconceptions effectively.

OVERALL USAGE FOR TEACHERS

Month	Max Usage	Teacher Name	Unique Login Days
Jul-2025	10 hours 26 minutes	ADMIN 5018164	19
Aug-2025	7 hours 10 minutes	ADMIN 5018164	22

Mar-2026	1 hours 2 minutes	Komali Kumari Vegi	1

BEST PRACTICES RECOMMENDED FOR EI MINDSPARK

Ei Mindspark Usage

Ei Mindspark works best when done as a part of classroom activity. We recommend having a laboratory in the school where students spend time on Ei Mindspark under the guidance and supervision of the teacher.

1. Set timetable assigned for each subject: Two periods of each subject as per the school timetable can be allotted for this purpose.
2. At least 60 minutes of usage per student per week spread out across days.
3. All students should log in during the assigned periods. Using the “Live Class” feature brings visibility to this.

Ei Mindspark Implementation: Topics and Worksheets

1. Activate Topics pertinent to current classroom teaching.
2. Use Sample questions for every concept to understand:
   a. The flow of the concept and pedagogical aspects used on Ei Mindspark
   b. The use of some of these questions for classroom teaching.
3. Select 4-6 concepts while activating a topic to ensure optimal engagement.
4. Have not more than 3-4 topics active for a class at any point to help students focus.
5. Use the “Multiple Priority” feature to ensure topic progress.
6. Aim for 80-90% topic progress on activated topics and deactivate those that have reached satisfactory progress.
7. Enable/disable Multiple Priority and visibility of Deactivated Topics for home usage at the school's discretion.
8. Use the Worksheet feature for customized questions.
9. For student-specific worksheets, use the “Differentiated Worksheet” feature.
10. Edit worksheet due dates if the due date has not passed.

Ei Mindspark in Classroom Transactions

Discuss common wrong answers and misconceptions that appear on the topic page. Teacher intervention is recommended if:

1. A student's accuracy is low in the first attempt of a topic.
2. A student is not spending enough time on questions.
3. A student is struggling with a concept/series of questions.
4. A student is not completing topics/worksheets activated.
5. Use "Shared worksheets" and "Topics from other teachers" to share resources among co-teachers.

Rewarding Students

1. Recognize students who feature as Sparkie Stars/Sparkie Champs in addition to the E-Certificates they receive.
2. Celebrate milestones of student learning using the Ei Mindspark badges and stickers for positive reinforcement.
