Mindspark

Silver Oaks High School

Ei Mindspark Learning Report

Academic year: 2025

Report Duration 01-Jun-2025 to 31-Mar-2026

Registered Classes: *Class 3 to Class 10*

Registered Students: 1,717

For any queries, please contact **Manavi Khandelwal** at **08929531699** between 10 AM and 5 PM (Office Hours).

CONTENTS

Section	Page No
Overall Metrics and Engagement	3
Classwise Learning Progression from Pre to Post Checkpoint	5
Celebrating Achievements and Milestones	6
Monthly Engagement Metrics	7
Classwise Usage Metrics	8
Bridge Mindspark Learning Gaps through Ei Remedials	10
Ei Mindspark Higher Levels	11
Leveraging Ei Mindspark To Enhance Teaching/Learning	12
Best Practices Recomended for Ei Mindspark	13

This report provides a detailed analysis of student engagement and learning outcomes for **Silver Oaks High School** during the academic year **2025**, covering the period from **01-Jun-2025 to 31-Mar-2026**. The report includes data for the following registered classes: **3 to 10**. A total of 1717 students participated in the Ei Mindspark program during this period.

OVERALL METRICS AND ENGAGEMENT

Average usage (per student)	Students Logged In (46.2%)	Total Questions Attempted
27.4 mins/week	794 / 1,717	1,293,989

Overall Accuracy	Overall Teacher Usage	Total Remediation Instances
71.8%	247 hrs	3,347

Total Games Played	Average Games played per Student	Teacher Time Saved (in mins)
8,524	11	24,388

Total Higher Level Instances	Average Questions Attempted per Student
2,454	753

Mindspark Usage Insights

The data reveals a promising level of engagement with Mindspark, yet highlights areas where focused interventions could unlock greater impact. With an average weekly usage of **27 minutes** per active student, there is an opportunity to encourage more regular practice sessions to drive better learning outcomes. Similarly, while the **46%** of students logging in is not alarming, increasing this percentage would ensure wider adoption and consistent skill development.

On a positive note, the **1.29 million** questions attempted and an overall accuracy rate of **72%** demonstrate the platform's effectiveness in enabling personalized learning journeys. The **754** average questions attempted per student further reinforces Mindspark's ability to adapt to individual learning needs. However, optimizing the overall accuracy through targeted content enhancements could potentially yield even better results.

Prioritize strategies to increase average weekly usage and student login rates.

Analyze subject or grade-level trends to identify potential content gaps impacting accuracy.

Leverage the strong foundation of engaged users and attempted questions to drive sustained impact.

**Note: The above insight is generated by AI, and it may not be as much accurate as it can be.*

CLASSWISE LEARNING PROGRESSION FROM PRE TO POST CHECKPOINT

Learning in Ei Mindspark can be best seen through checkpoints designated as Pre and Post checks before commencing and after finishing a topic activated by a teacher. Through this, learning gains can be observed across topics for every class.

Checkpoint (before) Checkpoint (after) Learning Gains

Class	Progress (Before/After)*	Learning Gains	Total Students
Sufficient information is not present for classes **3, 4, 5, 6, 7, 8, 9, 10**			

**Based on data from students who completed both the pre- and post-checkpoints*

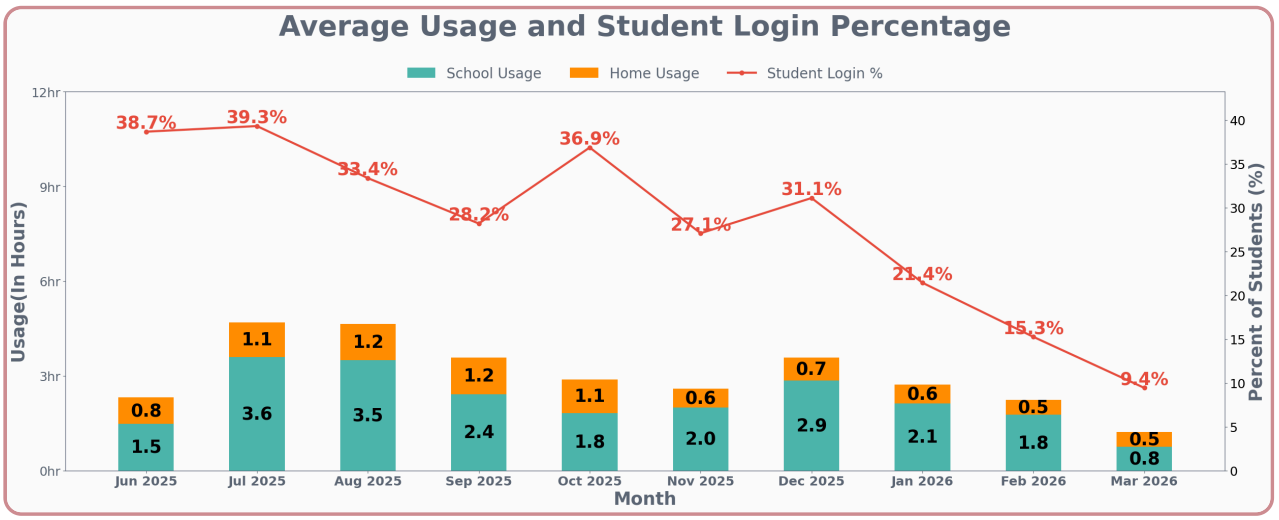
CELEBRATING ACHIEVEMENTS AND MILESTONES

Learning is not just about reaching the destination but also about cherishing and celebrating the milestones along the way. Sparkies in Ei Mindspark are virtual rewards and incentives awarded to students to encourage their learning progress, creating a positive learning environment that motivates students to actively participate, persist, and excel in their educational journey.

Class	Most Sparkies Earned By	Number of Sparkies	Most Questions Attempted By	Number of Questions Attempted
3	Harshil Allamsetty	15569	Charanjit Routhu	17309
4	Venkata Reshwanth Naidu Kimidi	16479	Mohit Machavarapu	18326
5	Hema Vasudha	37217	Hema Vasudha	26351
6	Arnav Gunta	7809	Arnav Gunta	8378
7	Shrikareddy Chinthalapani	4088	Shrikareddy Chinthalapani	5719
8	Lakshith Chowdary	5033	Niranjan Pamidi	2411
9	Aarohi Alok	1587	Khushal D	1628
10	Sampath Saicharan	2082	Sampath Saicharan	2014

MONTHLY ENGAGEMENT METRICS

Usage and login are first level indicators of activity on Ei Mindspark. Structured usage of Ei Mindspark has been found to lead to significant Learning Gains/Needs. The following charts highlight the total time spent by students in hours along with the percentage of students logging in, presented on a monthly basis.



*Total usage every month at home (4PM-8AM) and at school (8AM-4PM)

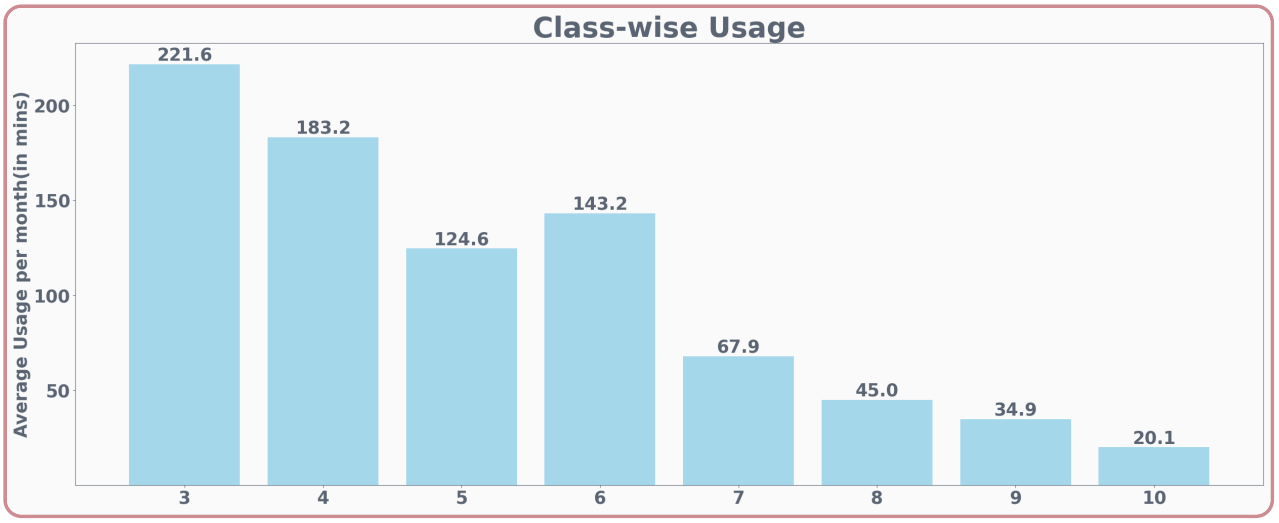
Monthly Usage Insights

1. Jul-2024 to Sep-2024 showed highest overall usage.
2. Dec-2023 and early 2024 exhibited declining usage patterns.
3. Usage surged mid-year, followed by a decline towards year-end.
4. Home usage remained consistent, while school usage fluctuated significantly.
5. Student login percentage decreased steadily, suggesting evolving usage habits.

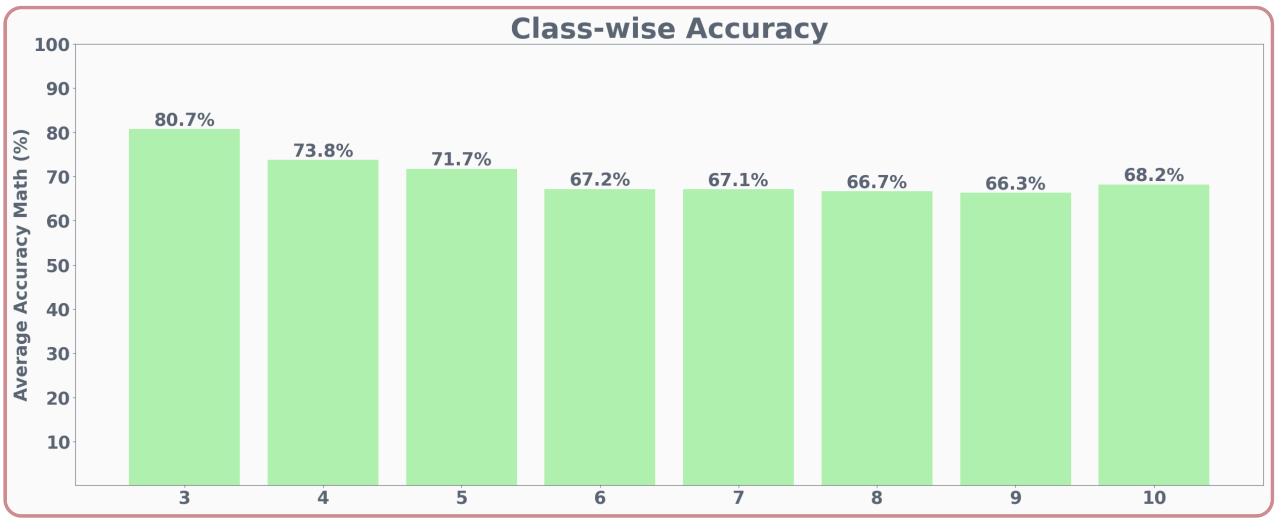
Note: The above insight is generated by AI, and it may not be as much accurate as it can be.

CLASS-WISE USAGE AND PERFORMANCE METRICS

The following charts shows the total usage (in minutes) and performance accuracy (in %) spread across each class. Performance in Ei Mindspark is an accumulation of accuracies built through learning, remediation, revision and accessing higher levels.



*Classwise total usage (in minutes)



*Classwise Accuracy (in %)

Class-Wise Usage Insights

1. Overall, there is significant variability in average student usage across classes.

2. Classes 3 and 4 have the highest average usage per month. These classes demonstrate high levels of engagement with the material.

3. Classes 9 and 10 have the lowest average usage per month.

4. Average usage generally decreases as the class number increases from 3 to 10. Higher class numbers correspond to lower levels of engagement.

Class-Wise Accuracy Insights

1. The average accuracy across all classes is around 70%. 2. Classes 3 and 10 have the highest accuracy rates at 80.73% and 68.17%. 3. Classes 6 and 7 have the lowest accuracy.

**Note: The above insight is generated by AI, and it may not be as much accurate as it can be.*

Essence of Remedials

Ei Mindspark aims to support and guide students toward addressing any knowledge gaps or difficulties they may be facing by providing scaffolding in the form of remedials. They serve as a valuable learning tool to help students strengthen their grasp of the concept and enhance their overall learning experience.

Class	Total Remediation Instances*	Successful Remediation Instances†
3	391	285 (**73%**)
4	1295	832 (**64%**)
5	337	253 (**75%**)
6	729	522 (**72%**)
7	254	177 (**70%**)
8	152	115 (**76%**)
9	102	68 (**67%**)
10	87	59 (**68%**)

**Note: The remediated learning units are not unique; a student can enter remediation multiple times.*
†Note:These figures represent non-unique children who received remedial support to clear specific concepts. A successful remediation instance refers to a case where a student demonstrated improved understanding of the concept after receiving remedial support

The data shows that remediation efforts were most successful for Class 4, with 1295 successful remediations and 832 children getting remediated. This is followed by Class 6, Class 3, and Class 5. The higher classes (7, 8, 9, 10) had fewer successful remediations, indicating potential challenges in remediating older students.

Essence of Higher Level

EI Mindspark helps students go beyond the basics by offering advanced content that challenges them to think critically and deepen their understanding. These extensions encourage students to strengthen their skills, develop mathematical thinking, and become independent learners by exploring advanced concepts on their own.

Class	Total Higher Level Instances*	Successful Higher Level Instances†
3	1377	1296
4	484	389
5	435	425
6	91	84
7	33	32
8	30	30
9	2	2
10	2	2

**Note: The higher level learning units are not unique;*
†Note: These figures represent non-unique children who went to higher level instances .

The data shows that higher-level instances are more prevalent in lower classes, with Class 3 having the highest number of instances and children clearing them. As the class progresses from 4 to 10, the number of higher-level instances and children clearing them decreases significantly. This trend suggests that higher-level instances become less common or more challenging as students advance through their academic years.

LEVERAGING EI MINDSPARK TO ENHANCE TEACHING/LEARNING

Students' learning outcomes are significantly enhanced when teachers actively engage in their learning process. Ei Mindspark offers relevant data and monthly reports designed to gain valuable insights into various aspects of student learning. Teachers can track the progress and accuracy of each topic covered in Ei Mindspark. The Ei Mindspark teacher interface also provides a detailed learning trail for each student, showcasing their journey through different concepts and exercises. Ei Mindspark reports highlight common wrong answers and misconceptions, enabling teachers to address specific learning gaps and correct misconceptions effectively.

OVERALL USAGE FOR TEACHERS

Month	Max Usage	Teacher Name	Unique Login Days
Jun-2025	5 hours 41 minutes	Sisv Admin	24
Jul-2025	10 hours 22 minutes	Bhanu TEKU	28
Aug-2025	10 hours 50 minutes	3495131 Admin	24
Sep-2025	14 hours 16 minutes	3495131 Admin	27
Oct-2025	3 hours 22 minutes	Anusha1 Anusha	21
Nov-2025	3 hours 34 minutes	Swathi Bhuma	24
Dec-2025	8 hours 18 minutes	3495131 Admin	22
Jan-2026	2 hours 14 minutes	Swathi Bhuma	14
Feb-2026	1 hours 25 minutes	Swathi Bhuma	14
Mar-2026	1 hours 1 minutes	3495131 Admin	2

BEST PRACTICES RECOMMENDED FOR EI MINDSPARK

Ei Mindspark Usage

Ei Mindspark works best when done as a part of classroom activity. We recommend having a laboratory in the school where students spend time on Ei Mindspark under the guidance and supervision of the teacher.

1. Set timetable assigned for each subject: Two periods of each subject as per the school timetable can be allotted for this purpose.
2. At least 60 minutes of usage per student per week spread out across days.
3. All students should log in during the assigned periods. Using the “Live Class” feature brings visibility to this.

Ei Mindspark Implementation: Topics and Worksheets

1. Activate Topics pertinent to current classroom teaching.
2. Use Sample questions for every concept to understand:
   a. The flow of the concept and pedagogical aspects used on Ei Mindspark
   b. The use of some of these questions for classroom teaching.
3. Select 4-6 concepts while activating a topic to ensure optimal engagement.
4. Have not more than 3-4 topics active for a class at any point to help students focus.
5. Use the “Multiple Priority” feature to ensure topic progress.
6. Aim for 80-90% topic progress on activated topics and deactivate those that have reached satisfactory progress.
7. Enable/disable Multiple Priority and visibility of Deactivated Topics for home usage at the school's discretion.
8. Use the Worksheet feature for customized questions.
9. For student-specific worksheets, use the “Differentiated Worksheet” feature.
10. Edit worksheet due dates if the due date has not passed.

Ei Mindspark in Classroom Transactions

Discuss common wrong answers and misconceptions that appear on the topic page. Teacher intervention is recommended if:

1. A student's accuracy is low in the first attempt of a topic.
2. A student is not spending enough time on questions.
3. A student is struggling with a concept/series of questions.
4. A student is not completing topics/worksheets activated.
5. Use "Shared worksheets" and "Topics from other teachers" to share resources among co-teachers.

Rewarding Students

1. Recognize students who feature as Sparkie Stars/Sparkie Champs in addition to the E-Certificates they receive.
2. Celebrate milestones of student learning using the Ei Mindspark badges and stickers for positive reinforcement.
